

## 140C05 Full Color RGB LED Module for Arduino

### Specification:

- Size: 25 \* 21 mm
- Weight: 4 g
- Color: full color red, green, blue three primary colors
- Brightness: highlight
- Voltage: 5 v
- Input: digital level
- Interface: the Arduinos 4 p interface
- Platform: the Arduinos, single chip microcomputer
- Tricolor principle according to the multiple colors
- Through the PWM port control to realize full color display
- Arduinos PWM interface can be driven directly
